10. Annex A — Compliance Matrix 5

1. Executive Summary

Helix Ridge builds and operates HelixFlow, a configurable case management and workflow platform for public sector organisations, utilities and insurers. [S2] Helix Ridge has delivered more than 30 case management implementations in Germany and Austria since 2016. [S1] The company has worked with municipal administrations, energy utilities and insurance carriers. [S1] HelixFlow digitises citizen and customer requests end to end: intake, routing, case handling, approvals, correspondence and reporting. [S2] Average case handling time fell after go-live. [S3]

2. Technical Approach

HelixFlow supports single sign-on via SAML 2.0 and OpenID Connect, including Microsoft Entra ID and Keycloak. [S2] HelixFlow is operated as a multi-tenant software-as-a-service platform hosted exclusively in the European Union, in data centres in Frankfurt am Main (primary) and Dublin (backup). [S1] All customer data remains within the European Union. [S1] All data is encrypted at rest with AES-256 and in transit with TLS 1.3. [S3] Encryption keys are managed in a hardware-backed key management service. [S3]

3. Solution Architecture

HelixFlow is offered with a contractual availability of 99.9% per calendar month, excluding announced maintenance windows. [S4] Role-based access control restricts every function and data object. [S2] HelixFlow keeps a complete, tamper-evident audit log of all user and administrator actions, retained for at least ten years if required. [S2] Availability is monitored externally and reported monthly. [S4] The platform scales horizontally; production tenants serve up to 5,000 concurrent caseworkers. [S5]

4. Implementation Methodology

Implementations follow five phases: discovery (4 weeks), configuration in two-week sprints, data migration, training, and hypercare (6 weeks after go-live). [S2] A typical project team consists of a project manager, a solution architect, two to four configuration engineers, a migration specialist and a change and training manager. [S1] We do not offer on-premises deployment; the platform is provided exclusively as a managed cloud service hosted in the European Union. [S4] HelixFlow is not available as an on-premises installation. [S4]

Sources: [S1] Implementation and Delivery Methodology (evidence 2883a1c3); [S2] Implementation and Delivery Methodology (evidence 7cc4a2b9); [S4] Approved Standard Responses — Bid Library (evidence 2d71a268)

5. Delivery Plan

Delivery follows an agile, iterative methodology with fixed governance checkpoints. [S2] A joint steering committee meets monthly; a project board meets every two weeks. [S4] Projects are delivered by cross-functional teams of product owners, solution architects, engineers and change managers. [S2] Risks, decisions and changes are tracked in a shared register. [S4]

Sources: [S2] Capability Statement — Helix Ridge Software GmbH (evidence 13dd7699); [S4] Implementation and Delivery Methodology (evidence 5d28cab9)

6. Relevant Capabilities and References

Implemented HelixFlow for the customer service department of a regional energy utility. 450 caseworkers, migration of 1.2 million historical cases, delivered in 9 months. [S1] Delivered in 7 months with integration to the core claims system. [S2] Delivered in 11 months; WCAG 2.1 AA audited. [S3] Automated first notice of loss intake for motor and household claims, including document classification and routing. [S2] Digitised 14 permit and licence procedures for a district administration, including citizen portal, online payment and electronic file. [S3]

7. Risks and Assumptions

The following mandatory requirements are not yet evidenced and must be resolved before submission:

• REQ-001: Proposals must be submitted no later than 18 December 2026, 12:00 via the Lindenfeld e-tender portal. — status unverified. Confirm in the submission checklist.

• REQ-002: Questions for clarification must be submitted by 2 December 2026. — status unverified. Confirm in the submission checklist.

• REQ-003: The proposal shall not exceed 40 pages excluding annexes. — status unverified. Confirm in the submission checklist.

• REQ-004: Proposals shall be submitted in PDF format and signed by an authorised representative of the bidder. — status unverified. Confirm in the submission checklist.

• REQ-010: TR-05 The supplier must provide an on-premises deployment option for the platform. — status non compliant

• REQ-017: SC-02 The bidder must provide a current SOC 2 Type II report. — status unverified. No approved, valid certificate evidence for SOC2TYPEII.

• REQ-019: CO-01 Prices shall be quoted in EUR as a fixed price for implementation and an annual subscription fee. — status unverified. Provide evidence or an approved standard response for this requirement.

• REQ-020: CO-02 Payment terms of 30 days after invoice receipt must be accepted. — status unverified. Provide evidence or an approved standard response for this requirement.

• REQ-022: CT-02 Professional liability insurance with coverage of at least EUR 5 million is required. — status unverified. Provide evidence or an approved standard response for this requirement.

• REQ-024: Bidders must attach copies of all certificates referred to in section 4 and at least two reference letters from comparable projects. — status unverified. Confirm in the submission checklist.

Assumptions: pricing, staffing and dates are subject to confirmation by the bid owner; this draft contains no commercial commitments.

8. Compliance Response

Summary of the compliance matrix: 10 compliant, 1 non compliant, 1 partially compliant, 12 unverified. The full matrix with evidence references is attached as an annex.

9. Supporting References

• Capability Statement — Helix Ridge Software GmbH — Experience

• Capability Statement — Helix Ridge Software GmbH — Focus

• Reference Projects — Stadtwerke Talheim — customer service case management (2023)

• HelixFlow Platform — Product and Architecture Overview — Hosting and data residency

• HelixFlow Platform — Product and Architecture Overview — Identity and access

• HelixFlow Platform — Product and Architecture Overview — Security

• HelixFlow Platform — Product and Architecture Overview — Availability

• HelixFlow Platform — Product and Architecture Overview — Scalability

• Implementation and Delivery Methodology — Team

• Implementation and Delivery Methodology — Phases

• Approved Standard Responses — Bid Library — On-premises deployment

• Capability Statement — Helix Ridge Software GmbH — Delivery model

• Implementation and Delivery Methodology — Governance

• Reference Projects — Rheinmark Insurance — claims intake automation (2024)

• Reference Projects — District Office Aldersee — permit application workflows (2022)

10. Annex A — Compliance Matrix

ID	Requirement	Src	Status	Evidence
REQ-001	Proposals must be submitted no later than 18 December 2026, 12:00 via the Lindenfeld e-tender portal.	p.1	Unverified	—
REQ-002	Questions for clarification must be submitted by 2 December 2026.	p.1	Unverified	—
REQ-003	The proposal shall not exceed 40 pages excluding annexes.	p.1	Unverified	—
REQ-004	Proposals shall be submitted in PDF format and signed by an authorised representative of the bidder.	p.1	Unverified	—
REQ-005	Proposals may be submitted in German or English.	p.1	Unverified	—
REQ-006	TR-01 The solution must support single sign-on via SAML 2.0 or OpenID Connect.	p.1	Compliant	HelixFlow Platform — Product and Architecture Overview

ID	Requirement	Src	Status	Evidence
REQ-007	TR-02 All data must be hosted within the European Union.	p.1	Compliant	HelixFlow Platform — Product and Architecture Overview; Approved Standard Responses — Bid Library
REQ-008	TR-03 The platform shall guarantee an availability of at least 99.95% per calendar month.	p.1	Partially compliant	HelixFlow Platform — Product and Architecture Overview
REQ-009	TR-04 Data must be encrypted at rest and in transit using current industry standards.	p.1	Compliant	HelixFlow Platform — Product and Architecture Overview
REQ-010	TR-05 The supplier must provide an on-premises deployment option for the platform.	p.1	Non-compliant	Approved Standard Responses — Bid Library
REQ-011	TR-06 The solution shall provide a documented REST API for integration with existing municipal systems.	p.1	Compliant	HelixFlow Platform — Product and Architecture Overview
REQ-012	TR-07 The citizen interface should conform to WCAG 2.1 level AA accessibility.	p.1	Compliant	HelixFlow Platform — Product and Architecture Overview; Reference Projects
REQ-013	TR-08 The system must keep a complete audit log of all user and administrator actions.	p.1	Compliant	HelixFlow Platform — Product and Architecture Overview
REQ-014	TR-09 Backups shall be performed with a recovery point objective of no more than 4 hours.	p.1	Compliant	HelixFlow Platform — Product and Architecture Overview
REQ-015	TR-10 The user interface should be available in German and English.	p.1	Compliant	HelixFlow Platform — Product and Architecture Overview
REQ-016	SC-01 The bidder must hold a valid ISO/IEC 27001 certification for the operation of the offered service.	p.2	Compliant	ISO/IEC 27001:2022 Certificate; ISO 9001:2015 Certificate
REQ-017	SC-02 The bidder must provide a current SOC 2 Type II report.	p.2	Unverified	—
REQ-018	SC-03 An ISO 22301 business continuity certification is desirable.	p.2	Unverified	—
REQ-019	CO-01 Prices shall be quoted in EUR as a fixed price for implementation and an annual subscription fee.	p.2	Unverified	—
REQ-020	CO-02 Payment terms of 30 days after invoice receipt must be accepted.	p.2	Unverified	—
REQ-021	CT-01 The supplier shall sign the City's data processing agreement in accordance with Article 28 GDPR.	p.2	Compliant	Approved Standard Responses — Bid Library
REQ-022	CT-02 Professional liability insurance with coverage of at least EUR 5 million is required.	p.2	Non-compliant	—
REQ-023	Proposals will be evaluated according to the following weighting: quality of the solution 50%, price 30%, references 20%.	p.3	Unverified	—
REQ-024	Bidders must attach copies of all certificates referred to in section 4 and at least two reference letters from comparable projects.	p.3	Unverified	—
